Please tag or label all parts if choosing multiple colors. It will make it easier for us and will lessen the chance of mistakes happening.

Quantity	Color Choice	Part Description

We will call or message you if there is any confusion on instructions.

Special Instructions:

DISCLAIMER:

Powder coating items must withstand a **400**-degree cure temperature. You **must** remove all gaskets, seals, any plastic, or anything that cannot be coated etc. Custom Touch Coatings is not responsible for any piece that is damaged in the disassembly process. Extra charges will apply for parts in need of dismantling and/or assembly. All parts will be media blasted and/or chemically stripped. Customer expressly acknowledges the existence of the pre-existing damage to parts described above and releases Custom Touch Coatings from any liability or loss in connection with such damage, including an exacerbation of the described damage.

Cast aluminum, cast iron, magnesium, or other specific substrate parts may experience out-gassing and/or bubbling in the powder coated finish. Custom Touch Coatings will take every precaution to avoid out-gassing, however Custom Touch Coatings cannot be held responsible for bubbling caused by porous substrates.

Custom Touch Coatings does everything in their power to get your items prepped and coated in a timely fashion. Due to having many customers, we have found it easier for both the customer and Custom Touch Coatings to use the first in first out method. Turnaround times change daily and we do our best to represent an accurate time frame.

Custom Touch Coatings is not responsible for any items that are damaged during the powder coating process or shipping process. Customer is responsible for all interior & exterior cleaning prior to placing items back into use. After completion, parts will be shipped back to the customer once the job is paid for **in full**.

Customer agrees to all the information stated above.
